# ACHIEVING AESTHETIC EXCELLENCE

Hot Tips and Tricks for  
the General Practitioner

New Zealand Academy of Cosmetic Dentistry

DEDICATED TO ADVANCING THE ART AND SCIENCE  
OF COSMETIC DENTISTRY IN NEW ZEALAND

## PRE-CONFERENCE REGISTRATION

15 CPD credits

NZACD & Dental Expo in partnership

Created with

professional

NZDA Accredited: NZDA course accreditation does not imply promotion or endorsement of the contents of any product or service. It is the responsibility of the practitioner to exercise their own judgement to assess the validity and usefulness of techniques, materials or therapeutic products to their own practice.

# Welcome from the Conference Chair

Our 4th Biennial Symposium, "Achieving Aesthetic Excellence: Hot Tips & Tricks for the General Practitioner", offers you more clinical speakers than any previous NZACD conference to bring you the largest independent New Zealand dental event for 2011. We will showcase six clinical speakers over three days at the Trusts Stadium, Auckland, giving our attendees over 16 hours of clinical CPD. Our symposium complements the 2011 Dental Expo, the biggest dental Expo for the year.

Our speakers are led by Dr David Hornbrook who is no stranger to New Zealand or the New Zealand Dental Profession. Dr Hornbrook is an accredited member and Fellow of the American Academy of Cosmetic Dentistry. He was the founder and past director of P.A.C.-live, and The Hornbrook Group. He has lectured internationally on all facets of Aesthetic Dentistry, serves on the board of REALITY and published articles in all of the leading dental journals.

We are privileged to present three of New Zealand's most recognised international speakers in the field of Aesthetic Dentistry, Dr Andrea Shepperson, past Academy Chairperson, and Drs Richard Eilenberg and Michael Danesh-Meyer. All maintain successful private practices and are sought after internationally as educators and mentors.

The Academy welcomes back both Dr Michael Danesh-Meyer and Dr Andrea Shepperson who have received overwhelming positive feedback from previous symposiums. We also welcome Dr Richard Eilenberg who was a pioneer of Cosmetic Dentistry in New Zealand and establishing in 1998, New Zealand's first private teaching institution, the 'New Zealand Institute of Cosmetic Dentistry' specialising in hands-on courses for general dentists.

We are pleased to have two of our committee members, Dr David Lovrich and Dr Clarence Tam present three complimentary thirty minute lectures on the Saturday.

Complimentary buses have been organised to take registrants from the Rendezvous Hotel in Mayoral Drive to and from the Trusts Stadium. The stadium also provides 380 free car parks for those who choose to drive independently.

The NZACD, in association with Lexus of Auckland City, will offer a 2 day weekend at Kauri Cliffs Lodge, and a three day use of a top of the range Lexus to one of our registrants. This prize will be drawn during the symposium.

We would also like to acknowledge the support of BNZ in bringing you the NZACD conference. BNZ has dedicated Business Partners throughout New Zealand who provide a fresh approach to business banking for medical practitioners, and are available for you to discuss your business with. To find out more about what they can offer you, pop by to visit them at the BNZ stand on-site.

The Academy is proud of our relationship with speakers of such depth and knowledge. The strength of our relationship with the dental industry and our recognition of their role in bringing the best technology and materials to New Zealand is reflected in our decision to hold our meeting in conjunction with the Industry Expo.

Support our industry colleagues by attending the Expo and our joint social functions.

I look forward to seeing you and your team there in June.

A handwritten signature in black ink, appearing to read 'John Wright'.

Dr John Wright BSc DipSci BDS FRACDS  
Conference Chairman

## Dental Expo sessions – Saturday 18 June

Genesis Energy Lounge  
Trusts Stadium  
65-67 Central Park Dr  
Henderson

**Dr Dave Lovrich** BDS

9.00am – 9.30am

### How to Choose a Composite

Dave will look at the properties a composite should possess before being able to decide if the product will satisfy the case requirements. The lecture will also discuss the differences between a microfill and a hybrid and when each is to be used.

Genesis Energy Lounge  
Trusts Stadium  
65-67 Central Park Dr  
Henderson

**Dr Dave Lovrich** BDS

9.30am – 10.30am

### What Wedge and Where

There are many different wedges – none are perfect but all can be useful in different situations.

As an outcome of this presentation, a dentist will be able to decide which wedge is best suited for the various restorations he places. The intention is to be able to avoid overhangs, filling deficiencies, or labour intensive finishing of our composites.

Genesis Energy Lounge  
Trusts Stadium  
65-67 Central Park Dr  
Henderson

**Dr Clarence Tam** HBSc, DDS

10.00am – 10.30am

### Minimally Invasive, Maximally Aesthetic

Clarence will guide you through a scintillating journey of cases and techniques guided by the principle of Minimally-Invasive, Maximally-Aesthetic cosmetic dentistry.

## DENTAL EXPO OPENING TIMES

Thursday 16 June: 12.00pm – 9.00pm

Friday 17 June: 8.30pm – 6.00pm

Saturday 18 June: 8.30pm – 5.00pm

## WIN A WEEKEND WITH LEXUS AT KAURI CLIFFS

The NZACD, in association with our proud sponsor Lexus of Auckland City, will offer a 2 day weekend at Kauri Cliffs Lodge, golf course and spa, a complimentary round of golf, and a three day use of a top of the range Lexus to one of our registrants. This prize is conservatively

valued at NZ\$4000. Please register for our Symposium to be eligible to enter this most generous draw.

Check out the Lexus cars which will be on display outside the main entrance at the Trusts Stadium during the Symposium.

Lexus of Auckland City is an authorised Lexus dealer. Lexus New Zealand is a division of Toyota New Zealand Limited which is owned by Toyota Motor Corporation of Japan, part of the Toyota Motor Corporation group of companies.

The lodge at Kauri Cliffs is located in the Bay of Islands, in the North Island of New Zealand. This luxury lodge is one of the most awarded luxury boutique golf & spa resort hotels in New Zealand and is set on 6,500 acres near Matauri Bay, Northland.

Contact the NZACD for detailed terms and conditions of this prize draw.

# SPEAKERS

## Dr David Hornbrook DDS, FAACD

Dr David Hornbrook graduated from UCLA School of dentistry and currently practices in San Diego, CA.

He has been a guest faculty member of the post-graduate programs in Cosmetic Dentistry at Baylor, Tufts, SUNY at Buffalo, UMKC, and the UCLA Center of Cosmetic Dentistry. He has consulted with numerous manufacturers in product

development and refinement and is on the editorial board of Practical Procedures & Aesthetic Dentistry, Contemporary Esthetics, Signature, and is the past editor of the Journal of the American Academy of Cosmetic Dentistry.

He is also the current clinical editor of the Dental Practice Report, as well as a member of the Esthetic Dentistry Research Group, which publishes REALITY and REALITY NOW.

Dr Hornbrook is an accredited member and Fellow of the American Academy of Cosmetic Dentistry and was the founder and past director of P.A.C.-live, and The Hornbrook Group. He has lectured internationally on all facets of aesthetic dentistry and has published articles in all of the leading dental journals.

**Thursday 16 June 8.10am – 10.00am**

### **Achieving Aesthetic Excellence Hot Trips & Tricks for the General Practitioner Beauty is in the Eye of the Beholder**

For the past decade, the search for invisible, beautiful dentistry has been the goal of both the clinician and the manufacturers. The astute clinician, if he or she desires not only to provide beautiful aesthetics, but also for these aesthetics to continue to function long term, must be willing to take the steps necessary to truly understand the advantages, disadvantages, indications, and contraindications of these new materials. Without this knowledge, the quality of care delivered will be compromised.

Join Dr David Hornbrook as he explores our options for aesthetic, metal-free dentistry for our patients.

Objectives and subjects covered will include:

- Understanding the advantages of the new ceramics ideal for smile designs
- Leucite Reinforced
- Lithium Disilicate (E.Max, Ivoclar)
- Lava Supported Restorations
- Preparation ideals
- How to place invisible Supragingival margins
- Blocking out dark preparations
- Understanding why correct choices in materials will yield preferred results, and more.

**Thursday 16 June 10.30am – 12.30pm**

### **To Prep or not to Prep?**

Are non-prep veneers an option for the demanding dentist and their patients?

One of the hottest topics in dentistry today is that of "No Prep" veneers. The interest is obviously consumer driven and the increased interest by clinicians is a direct result of their patients asking about it. Join Dr. Hornbrook as he explores the indications, contraindications, and material choices for this exciting procedure. Discussion will include patient records, smile design and the appropriate lab communication to achieve outstanding results!

Objectives and subjects covered will include:

- Case selection – no prep and minimal prep cases
- Creating an ideal result with Smile Design
- Material Selection
- Fabrication Technique of ultra thin pressed ceramic
- Cosmetic clinical photography
- Lab Communication
- Patient Presentations
- How to cement, efficiently
- How to increase Smile Design Cases.

**Friday 17 June 8.10am – 10.00am**

### **Achieving Aesthetic Excellence Hot Trips & Tricks for the General Practitioner**

#### **Lasers in Aesthetic and Restorative Dentistry**

Dentistry has changed tremendously over the past decade to the benefit of both the clinician and the patient. New materials and technologies have improved the efficiency and predictability of restorative dentistry for clinicians. One technology that has become increasingly utilized in clinical dentistry is that of the laser. Initially introduced as an alternative to the traditional halogen curing light, the laser now has become the instrument of choice in many applications, for both periodontal and restorative care. Join Dr David Hornbrook as he explores the use of lasers in aesthetic and restorative dentistry.

Objectives and subjects covered will include:

The use of lasers to enhance the Aesthetic result including:

- "Closed-Flap" osseous crown lengthening
- Ovate Pontics
- Hard Tissue Applications
- Gingival Recountouring
- Frenectomies
- Periodontal Treatment.

**Friday 17 June 10.30am – 12.30pm**

### **State-of-the-Art Posterior Aesthetics**

Adhesive dentistry and new restorative materials that yield improved physical properties give the astute clinician an opportunity to provide their patients with conservative and aesthetic alternatives to traditional posterior restorations. Success is directly related to understanding proper preparation design, choosing the correct materials, laboratory communication, and following proper adhesive cementation protocol. Dr Hornbrook has placed thousands of both ceramic crowns and indirect-resin inlays and onlays since 1986 and has consulted with numerous manufacturers and laboratories regarding material refinement and increasing predictability. Join him as he demonstrates why these restorations should become the backbone of most aesthetic. State-of-the-art practices.

Objectives and subjects covered will include:

- Understanding the advantages of the new ceramics ideal for posterior restorations
- Cerec 3D
- Leucite Reinforced
- Lithium Disilicate (E.Max, Ivoclar)
- Lava Supported Restorations
- Understanding how we can truly be metal-free, even with posterior bridges
- Eliminating the need for traditional core build-ups in the posterior when using "bonded" ceramics.

## Dr Andrea Shepperson BDS

Dr Andrea Shepperson graduated from the University of Otago in 1984 and has been influential in shaping the New Zealand dental scene through innovation, trend setting and clinical excellence. She has contributed to the development of dentists and dental staff through lecture programmes, hands-on

demonstrations and discussion groups.

She is currently Clinical Leader at Lumino's City Dental at Quay Park, a general and cosmetic practice in Auckland. Her clinical interest and expertise is aesthetic reconstruction including implant restoration, particularly in the aesthetic zone. She has been an active member of the American Academy of Cosmetic Dentistry since 1998 and is an International Opinion Leader for Ivoclar Vivadent Ltd.

Andrea launched Smile Mentor in 2010 – a clinical consultancy to assist dentists with technique, materials and mastering comprehensive diagnosis and treatment planning. She has worked successfully in a mentoring role, assisting group practices achieve new levels of productivity and clinical mastery.

## STRESS FREE ALL CERAMIC CEMENTATION: A STEP BY STEP CLINICAL GUIDE

Work through the steps to manage the cementation of all ceramic restorations including veneers, onlays and crowns, from the lab, through try-in and finally to the mouth.

**Thursday 16 June 3.30pm – 5.30pm**

### Part 1: The Restoration

- Manage the porcelain surface for best bonding
- Checking lab work – contacts, fit
- Porcelain etch – which one and for how long?
- Use try-in pastes and cement selection
- How to clean bonding surfaces after contamination.

**Friday 17 June 3.30pm – 5.30pm**

Work through the steps to manage the cementation of all-ceramic restorations including veneers, onlays and crowns, from the lab, through try-in and finally to the mouth.

### Part 2: The Tooth

- Simple rubber dam isolation
- Cleaning the tooth surface for best bond strengths
- Total etch versus self-etch – when to use each technique
- Cement selection – which one should I use
- Easy cement clean up
- Finishing and polishing, including occlusal adjustment.

## Dr Michael Danesh-Meyer

BDS MDS (perio)

Dr Danesh-Meyer gained his BDS and MDS [with Distinction] from University of Otago. He subsequently taught at the University and was in full-time

private practice limited to dental implants and periodontics in New Zealand prior to his academic appointment in the USA. From 1998-2000 he was Clinical Assistant Professor in Periodontology and Associate Scientist in the Laboratory for Applied Periodontal and Craniofacial Regeneration at Temple University, School of Dentistry in Philadelphia.

He has been involved in preclinical and clinical research involving GTR/GBR & dental implants since 1991, has authored numerous articles and lectures both nationally and internationally on topics related to tissue regeneration and dental implant therapy. While in the USA he was involved in research using recombinant bone morphogenic proteins (rhBMP-2) for periodontal and alveolar regeneration.

Dr Danesh-Meyer returned to New Zealand in 2000 and established the Institute of Dental Implants & Periodontics and the Auckland Clinical Training Centre in Newmarket, Auckland. Dr Danesh-Meyer is a Fellow of the International Congress of Oral Implantologists, ITI member, Faculty member for Global Institute for Dental Education/UCLA Masters program in implant dentistry and is actively involved in teaching periodontics and implant dentistry to dentists, postgraduates and specialists.

Thursday 16 June 1.30pm – 3.00pm

## PROSTHETIC PROBLEMS WITH IMPLANTS AND HOW TO AVOID AND FIX THEM

This lecture will focus on some of the more common problems encountered during the fabrication and delivery of definitive restorations on dental implants. The restoration of dental implants can be technique sensitive and technically demanding. A successful restoration requires careful treatment planning, an understanding the strengths and weaknesses of the different materials being used, working closely with your dental laboratory and respecting the peri-implant interface. We will examine when problems are likely to be encountered during the fabrication and placement of implant supported restorations and how to avoid them.

Some of the topics covered include:

- Excess subgingival cement
- Errors in fixture head impressions
- Subgingival emergence profile
- Gingival recession
- Abutment selection and design
- Incomplete seating of crowns and screw loosening.

### Learning Objectives

- How to recognise aesthetic periodontal implant issues
- How to recognise aesthetic differences between implant systems
- Learn solutions to common implant aesthetic problems.

## Dr Richard Eilenberg

BDS (Otago) MSc (Lon)

Dr Eilenberg gained his Bachelor of Dental Surgery from Otago in 1981 and was awarded the "Leask Silver Memorial Medal" for Conservative Dentistry. In 1989 he gained his Master of Science (London) in Restorative Dentistry

and in 1991 established the "Cosmetic Dental Clinic" in Remuera, Auckland.

In 1995 Dr Eilenberg established the "Cosmetic Ceramics Laboratory" where he employed master technician Ron Winter, as well as establishing in 1998, New Zealand's first private teaching institution, the "New Zealand Institute of Cosmetic Dentistry" specialising in hands-on courses for general dentists.

He began lecturing internationally on cosmetic dentistry techniques in 1999.

In 2000 Dr Eilenberg was elected President, Diplomat and Life Member of the "World Congress of Microdentistry" based in the USA. In 2001 he was awarded New Zealand's first "Advanced Certificate in Dentistry".

Dr Eilenberg purchased Cerec 3 in 2002. He also purchased E4D in 2009 and became a New Zealand trainer for advanced techniques using ED4 in 2010. He also became a Biolase iLase trainer in the same year.

Friday 17 June 1.30pm – 3.00pm

## WHY YOU CAN NEVER HAVE TOO MUCH PORCELAIN

What is this material? It is long-lasting, durable, customizable, bondable, and aesthetic.

It has all the features of a perfect, tooth-like replacement. But how do we use it and in what situation? What preparation techniques are required?

Compare lab-made restorations with in surgery CAD CAM, we now have options.

Just as important is the excitement and emotion that must be generated in the patient in order for them to say "yes".

Step by step cases will help you explore the world of indirect restorative dentistry.

### Learning Objectives

- Visualize the extensive use and possibilities of porcelain
- Review preparation, soft tissue management, and cementation techniques
- Discover how to create value in your presentations for high quality dentistry.

# Social programme

## NZACD Opening Comedy Night

Kindly sponsored by

**Lumino**  
The Dentists

Wednesday 15 June

6.00pm refreshments. Show starts 8.15pm

Venue: **Classic Comedy & Bar, 321 Queen Street, Auckland**

Complimentary to the first 100 registrants.  
Additional tickets \$50 each

Join us for a light-hearted look at life and dentistry with some of New Zealand's best comedians.

Try your hand at stand-up comedy – join in and be part of the show. Prizes for the best dental and general jokes from the audience.

Prize for the best dental joke (Composite Renamel kit) courtesy Aluro Healthcare.

The Classic, New Zealand's world class home of live comedy is located in the heart of Auckland's entertainment precinct. Open up to six nights a week, featuring local and international guest acts.

New Zealand's only fulltime professional comedy club opening in October 1997 and in three short years went from being 'the new kid on the block' to an institution on the local entertainment scene.

The original design and layout of the Classic is based on some of the most successful clubs in the USA and the UK, so not surprisingly, many of the international acts that have played The Classic have had nothing but praise for the atmosphere and audiences.

The Classic is situated in the heart of Auckland's entertainment precinct. You can't miss the big comedy neon sign.

## 2011 Dental Expo Ivoclar Vivadent Grand Opening including the Henry Schein Shalfoon Dental Fashion Show

Thursday 16 June  
6.00pm – 9.00pm

Venue: **Trusts Stadium  
Auckland**

**Complimentary**

# Smile Gallery Competition

The NZACD is proud to announce the return of the Smile Gallery Competition to showcase our members' clinical talents and photographic prowess.

The Smile Gallery is an NZACD event organised to provide intelligent and constructive comments to the entrant to foster their growth and development in the art and science of cosmetic dentistry.

All entries will be judged by our speakers and the winners will be announced at the *Ivoclar Vivadent* Grand Opening event.

Cases are to be submitted under one of the following categories:

### DESIGNER SHOWCASE – A CELEBRATION OF ENHANCED SMILES

- In this category, multiple restorations are used to improve a patient's smile.
- Suggested cases include – indirect restorations, direct restorations, missing anterior tooth restorations – bridge or implant.

### SIGNATURE SHOWCASE – FOOLING THE EYE

- In this category, the restoration (s) intend to mimic nature.
- Suggested entries include – single unit anterior or posterior aesthetics, crowns, onlays, bridges or implants, and special effects.

Entries must have been taken by the actual treating dentist or ceramist involved.

No professional photographers are to be used.

Included with each entry should be a paragraph summarizing the photographic equipment used (e.g. film or media type, camera model) and the lighting used so that we can all learn and benefit.

There are no restrictions on size, type of photo, or orientation but no post-production manipulation (air-brushing, digital enhancement, etc) is allowed.

Please download an entry form from the Symposium section of our website [www.nzacd.co.nz](http://www.nzacd.co.nz).

There is no limit as to the number of entries per category accepted from any single participant.

# Why join NZACD?

Membership of the NZACD offers professional collaboration with dentists who are driven by quality, a quest for self-improvement and knowledge that is supported by science.

Join a network of colleagues who will raise the bar and share your enthusiasm for multi-disciplinary, leading edge dentistry founded on the aims of its parent organisation – The American Academy of Cosmetic Dentistry – the world's largest organisation devoted to cosmetic dental excellence.

NZACD Members have indicated that one of the most important things to them about their membership is:

- The opportunity to interact and a network that is offered through local study group meetings throughout New Zealand.

Auckland has four Tuesday meetings every year, Wellington and the South Island have two meetings. These study group meetings are complimentary to all members. The Academy executive committee is available to provide a mentoring role to assist with the operation of these groups.

- The NZACD run a series of lectures and hands on courses in a wide range of topics related to Cosmetic Dentistry. All courses qualify for verifiable continuing education hours and credits, not to mention making you a better dentist or ceramist. Academy members qualify for discounts to attend.
- NZACD Members also receive discounts to other continuing education courses that may be available and the annual savings amount to more than the annual membership fee.

## NETWORKING

The NZACD has open dialogue between study groups throughout New Zealand and international support through its affiliate organisations, namely the AACD, IFED, ESED and BACD. This gives us contacts with other motivated dentists with a special interest in Cosmetic Dentistry in 57 countries worldwide.

## NZACD INTERNATIONAL SYMPOSIUM

You are enjoying the benefits of learning from world class, independent international speakers. The NZACD aims to continue to present speakers who are independent of supply companies. We aim to bring international speakers here for a multi-day programme on a biennial basis. In selecting our speakers we recognise the importance of cohesion between all members of the dental team, dentists, ceramists, and auxiliary staff. Academy members qualify for a 20% discount.

## NEWSLETTERS

Newsletters are produced quarterly and aim at providing our members with an independent viewpoint on issues facing them in Cosmetic Dentistry.

## WEBSITE

The website [www.nzacd.co.nz](http://www.nzacd.co.nz) has both public and member sections – the public section serves to promote cosmetic dentistry. We are proud to be able to activate your access to the "Members Only" section.

## MULTIMEDIA LIBRARY

The NZACD has a collection of Cosmetic Dental related educational material on DVD available for hire.

We provide members with a membership certificate plus a sticker which can be affixed to the inner surface of any glass window or door in your practice, to further publicise your commitment to Cosmetic Dentistry.

## BUSINESS PARTNERSHIPS

The Academy encourages you and your colleagues to join us as the larger our membership, the more benefits we are able to provide to you. Currently, projects that will benefit you as a member include access to BNZ's world-class Partners Centres, access to BNZ's educational Growth Programmes, the opportunity to meet one-on-one with BNZ's specialist Business Partners at your convenience and a telecommunications deal with CallPlus
